Summary — Results-driven Senior Software Developer with 3+ years of experience in designing, developing, and deploying CRM systems, web applications, and telephony-integrated solutions for BPO environments. Strong expertise in backend logic, REST API development, third-party integrations, and full-stack architecture. Experienced in leading development teams, managing client requirements, and delivering scalable, high-performance solutions.

Professional Experience

Winet Infratel Pvt. Ltd., Noida

Senior Software Developer (*Promoted from Software Developer*)
Mar 2023 – Present

Key Responsibilities & Achievements:

- Designed and developed CRM systems for BPO clients, including agent routing, call distribution, login security, and disposition management.
- Migrated legacy CRM systems: frontend to HTML & Bootstrap, backend to PHP & Node.js, improving performance and scalability.
- Developed scalable REST APIs and integrated multiple third-party APIs.
- Built and maintained e-commerce, blogging, and dynamic/static websites.
- Led development teams, handled client communication, gathered requirements, and ensured timely project delivery.
- Managed server deployment, SSL implementation, and hosting environments.

Technologies Used: PHP, MySQL, Node.js, JavaScript, Bootstrap, Linux

Digi Coder Pvt. Ltd., Lucknow

Web Development Intern
Jun 2022 – Mar 2023

- Developed small-scale web applications (To-Do App, Timer, Tic-Tac-Toe).
- Worked on e-commerce projects.
- Gained hands-on experience with PHP, CodeIgniter, MySQL, and WordPress.
- Learned real-world coding standards and development practices.

Key Projects

Next2Call (Commercial Website & Admin Panel)

- Developed a commercial website with an admin panel to manage visitors, collect leads, and publish blogs.
- Platforms: www.next2call.com | www.winet.co

Telephony Dialer Systems for BPO Clients

- Implemented agent (user) authentication and security mechanisms
- Designed call routing and incoming call distribution logic
- Developed multiple dynamic features for dialer systems
- Implemented basic lead management with scheduled calls and note tracking
- Worked on autodialing, predictive dialing, manual dialing, and click-to-call functionalities
- Built scalable dialer solutions covering key requirements of BPO operations

LiveKit Telephony & AI Bot Agent Integration

- Set up cloud-based LiveKit server to create telephony dialer environments
- Integrated LiveKit with Vicidial for real-time call handling
- Implemented AI bot agents to automate inbound and outbound call handling, reducing dependency on human agents
- Possess hands-on experience with LiveKit configuration and AI bot integration

Novillo Call Distribution CRM

- Contributed to BID-based intelligent call distribution system

Ticket Management CRM

- Developed email & SMS-based ticket generation and tracking system

Lead Squire CRM

- Integrated APIs for lead fetching and pushing data via vicidial dialer software

Click-to-Call & Call Report APIs

- Developed telephony APIs for inbound and outbound calling systems

EV Charger Admin Panel & Website

- Worked on backend logic and system administration

PM-WANI Admin Panel & Website

- Developed backend systems and admin management features

My Trip Ticket Booking CRM

- Implemented backend logic and system management features

Jitsi Meet Server Setup

- Deployed and configured self-hosted Jitsi Meet with domain whitelisting and secure setup

Technical Skills

Programming & Frameworks: • PHP, Node.js, Basic Python • JavaScript, HTML5, CSS3, Bootstrap	Database & CMS: • MySQL, phpMyAdmin • WordPress
Server & DevOps: • Linux (Ubuntu, CentOS) • Basic Asterisk Configuration • LiveKit Server Setup (Cloud) • SSL Certificate Installation & Management • Hosting (Hostinger, AWS, Microsoft Azure)	Backend & Integrations: • REST API Development • Third-Party API Integration • Click-to-Call API Development • Dialer & Telephony Integration

Education

Dr. A.P.J. Abdul Kalam Technical University B.Tech in Computer Science (Pursuing) Adhunik Institute of Education and Research, Delhi-Meerut	2023 – Present
Diploma in Computer Science & Engineering Government Polytechnic Changipur, Bijnor, UP (2019 – 2022)	2019-2022

Core Strengths

- Strong Backend Development & API Architecture
- Team Leadership & Collaboration
- Client Communication & Requirement Analysis
- Problem-Solving & Analytical Thinking
- Quick Learner with Adaptability to New Technologies
